To Whom It May Concern:

Dear Sir/ Madam,

Fancy colors of diamond occur naturally, but can also be introduced artificially in a laboratory. The Purple-Pink color of the round brilliant cut diamond weighing 1.21 carats described on GIA Laboratory Report Number 6167698201 was introduced by multiple-process treatment, which includes annealing under high-pressure and high-temperature (HPHT) followed by irradiation and annealing at a relatively low temperature.

Sincerely,

GIA Laboratory
